RALEIGH, N. C., February 29.—The
North Carolina Insurance Department
has received official notice of the appointment of receivers for the Mutual
Reserve Life Insurance Company, of
New York, and Judge Purnell, of the
United States District and Circuit
Courts here, has acted in anciliary proceeding by the naming of the same receivers of the company for the business in North Carolina, the purpose of
the proceeding in this State being to inquiry for cars he had ordered he was informed by an official of the Southern that the company lacked over

iness in North Carolina, the purpose of the proceeding in this State being to keep the funds of the company now in the State here for the protection, as far as possible, of the North Carolina policy-holders.

What Rate Litigation Cost.

Governor Glenn and other State officers in touch with the developments in the case say that it will be possibly months before the compromised railroad rate litigation will be finally closed up and the actual amount known. To date there has been paid out in attorneys' fees and court costs thus far audited \$18,829.24. However, there are yet other attorneys' fees to come in, besides fees and expenses of a number of expert witnesses summoned and various court costs, including NEW ELECTRICAL PLANT. [Special to The Times-Dispatch.]

BALTIMORE, MD., February 29.—11Instrating the agricultural progress of
the South in recent years are some
facts published in this week's issue
of the Manufacturers' Record about
the development that has taken place
in what is known as the wiregrass
region in Southern Georgia. Until the
last few years this region was a vast
stretch of original timber, where largetracts of land could be bought for from
50 cents to \$2.50 an acre. A traveler
inight then drive through the forest
for miles without seeing a first-class
farm. But the turpentine men and
jumberman came along, and their clearing of the land has been followed by
the creation of small, well tilled farms,
the building of good highways, the
construction of standard railroads and
the rise of many towns ranging in
population from 500 to 5,000.
